6. At last, all work complete, as below displayed (actual version is depended on the upgraded firmware), click"Exit".

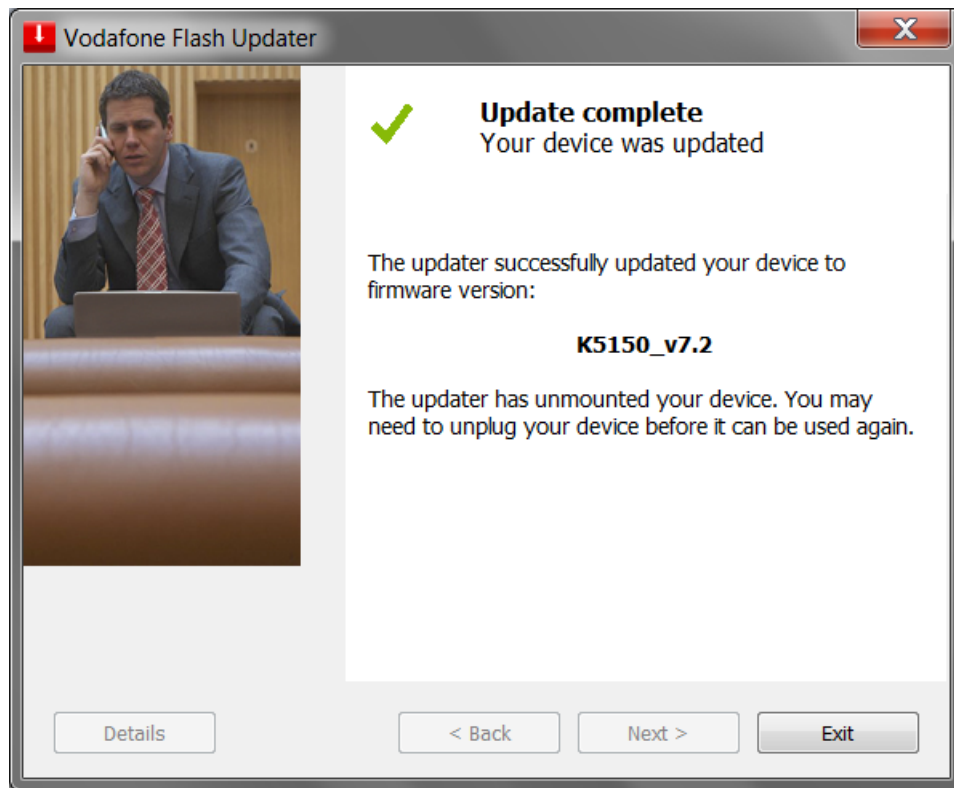

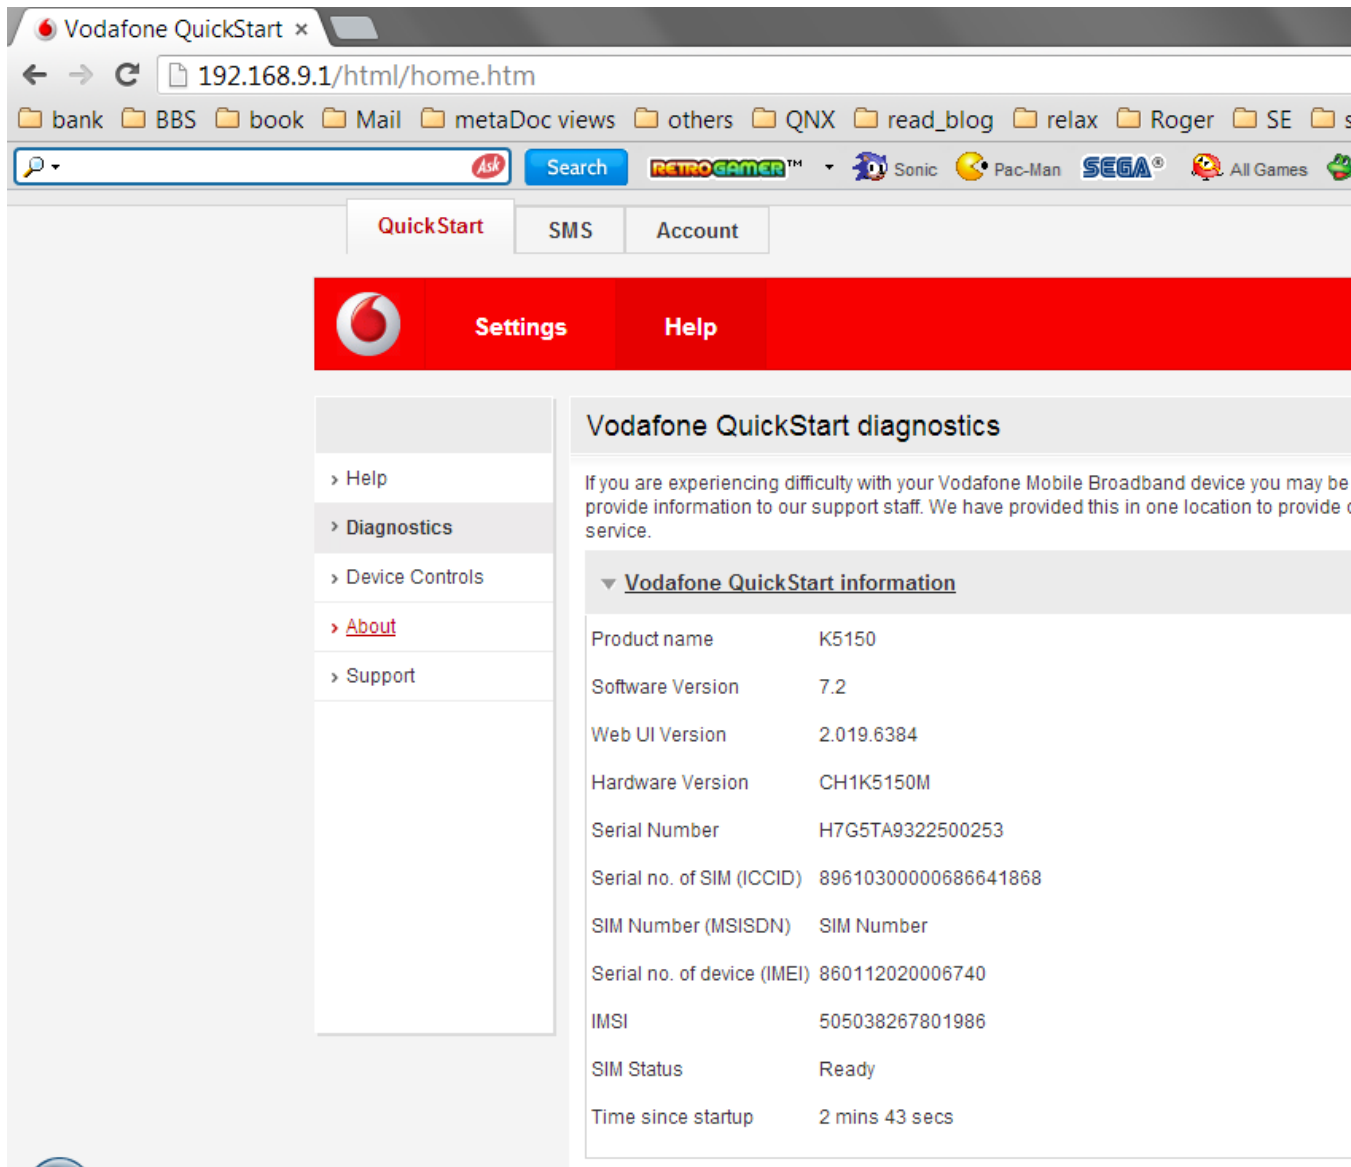

Figure 3.2.5 Upgrade Finish

7. After Upgrade Finish, please plug out the device, than insert K5150 again.
8. It's highly recommended to do 'Device Restore'. Please click WebUI Help -> Diagnose.

3.3 Check software version

- 1 . To the homepage: <http://192.168.9.1>, and login

then select "Help-->"Diagnostics" can see Version NO. 7.2, as below displayed:

The screenshot shows a web browser window with the address bar displaying `192.168.9.1/html/home.htm`. The page title is "Vodafone QuickStart". The browser's address bar shows a search bar with the text "Ask" and a "Search" button. Below the address bar, there are several icons for various services: "bank", "BBS", "book", "Mail", "metaDoc views", "others", "QNX", "read_blog", "relax", "Roger", "SE", and "s".

The main content area of the page is divided into two sections. On the left, there is a sidebar with a list of links: "Help", "Diagnostics", "Device Controls", "About", and "Support". The "Diagnostics" link is highlighted. On the right, there is a section titled "Vodafone QuickStart diagnostics". Below this title, there is a paragraph of text: "If you are experiencing difficulty with your Vodafone Mobile Broadband device you may be able to provide information to our support staff. We have provided this in one location to provide a better service." Below this text, there is a table with the following data:
